1 Introduction

The *EPO's Online Filing* (OLF) system and other *patent management systems* (PMS) used by applicants and attorneys are based on *XML* as the universal standard to store information and transmit data over the Internet. XML - the eXtensible *Markup Language* - allows users to define specific document structures (DTDs) and to use the data for various outputs. The transformation of XML data, e.g. into PDF documents or for display in a software's GUI, is typically handled by XLST and XFO processors.

A patent application prepared in Online Filing can be exported as a package consisting of several XML and PDF files that contain all the data entered by the user and all the attached electronic documents forming part of the application. Conversely, applications prepared by another PMS can be imported into Online Filing in order to be processed, validated and transmitted to the European Patent Office (EPO). Validating application data within OLF has the advantage that the legal rules and regulations are always up to date, because the updates released by the EPO are automatically installed by the OLF software.

To facilitate data exchange between OLF and other PMS in both directions, the XML data and the attached documents must match the same structures and file properties. Users of other PMS therefore need to convert their XML data into the structure required by OLF prior to import and also the other way round, in order to use data exported from OLF in their respective PMS.

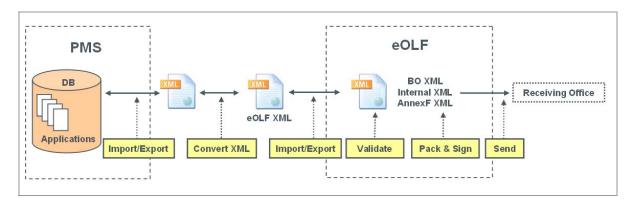

Figure 1: Exchange of XML data between PMS and OLF

The purpose of this document is to provide system developers and software engineers with the necessary resources to develop their own XML conversion tools. Knowing the XML structure and validation rules for the different application procedures in both OLF and target PMS will allow users to program tailor-made routines, so that data can be imported and exported without any loss of accuracy or consistency.

The instructions in the present document are provided by the EPO "as is" and may or may not be complete as to their ability to enable the development of the above described interaction with any particular patent management system.

It is anticipated that system developers and software engineers applying this information will use their knowledge in, amongst others, patent management systems and apply this to verify and enhance, where necessary, these instructions to develop the XML conversion tools for a designated patent management system.

2 Functionalities in Online Filing - Overview

2.1 System architecture and communication

Online Filing is a typical client-server application and can be installed in either stand-alone or network mode.

- In stand-alone mode, the server and the thin client work on the same machine.
- In network mode, the OLF server and the Firebird database are installed on a server machine within the user's network. The thin clients on the user's machines communicate with the server via the intranet (LAN) using CORBA or via the Internet using SOAP.
- The OLF server communicates with the EPO server over a secure Internet connection (https).
- The back-end system of the EPO communicates with the systems of the national patent offices over a VPN tunnel.

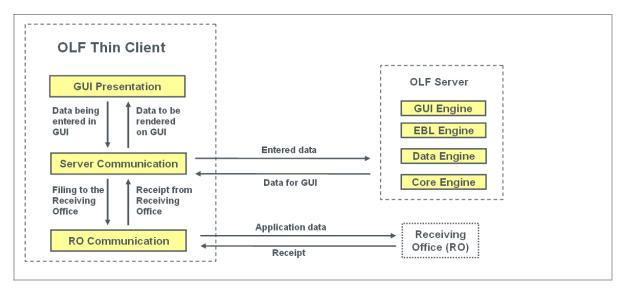

Figure 2: Communication between OLF thin client, OLF server and filing office

① See the OLF Installation Guide and OLF User Guide for more information on OLF functionalities, technology and installation. The latest OLF software and documentation are available free of charge from the Download Centre of the **EPO's Online Services website** (http://www.epoline.org).

2.2 Workflow in Online Filing

The user

- starts the thin client: the GUI is rendered from data provided by the OLF server.
- enters his application data in the GUI: the data is stored as temporary objects in the thin client machine's memory.
- saves an application as draft: the data from the GUI is written to the server's hard disk and also stored in a temporary folder on the client's hard disk.
- attaches all documents that are required for the selected procedure and saves the application as ready to sign.
- applies the signature to an application in the GUI: the application is packed as ready to send and stored on the server.
- initiates the sending process by the thin client: the server sends the packed data to be transmitted to the thin client.

The thin client

 transmits the package to the filing office and receives the transmission receipt, which is then saved on the server together with the application in sent status.

2.3 Data flow and XML transformation

Online Filing passes through the following steps to create electronic documents from data entered in the GUI:

- 1. The application data is kept in the memory as a business object tree.
- 2. The application data is mapped to a business object (BO) XML file.
- 3. The BO XML is converted to Annex F XML and Internal XML by XSLT style sheets and Xalan/Xerces.
- 4. The Annex F XML is converted to PDF by the XSL-FO style sheet using the formatting objects processor (FOP). This PDF is ready to be sent to the EPO.

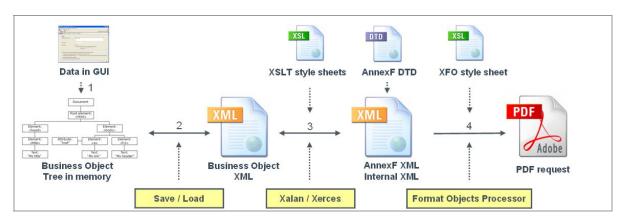

Figure 3: Transformation of data from GUI via XML into PDF

3 XML data exchange with patent management systems

3.1 How to use this document

Section 2 provides a brief overview of the functionalities, software architecture and transformation mechanisms implemented in EPO Online Filing.

Section 3 (this section) explains briefly how to convert XML data and import them into Online Filing.

Sections 4 to 7 demonstrate the mapping of data from the GUI with the XML data and PDF output. Sample cases are presented for the four most frequently used OLF procedures:

- ◆ EP(1001E2K) Request for grant of a European patent (EPC 2000)
- ◆ Euro-PCT(1200E2K) Entry into the European phase (EPC 2000)
- ◆ EP(1038E) Subsequently filed documents
- ◆ PCT/RO/101

The sequence in this document follows the sequence in the Online Filing GUI, starting with general data (e.g. the *Request* tab) and ending with the annotations. Each example shows a screenshot of the GUI, the XML file and the PDF document. The corresponding elements are numbered in the graphics and listed in an element list.

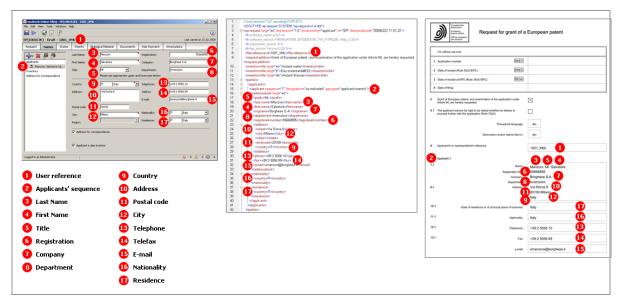

Figure 4: Mapping elements used in GUI, XML code and PDF form

The Annex in **Section 8** offers further information on EP and international filing, file naming conventions, and element and attribute lists.

3.2 Converting PMS data into XML for OLF

Start your project with an in-depth analysis of the XML structure produced by your PMS. Then set up detailed rules on which PMS data has to be mapped to which OLF data.

- → Use the XML element list (p. 237) for OLF contained in the annex to this document.
- → Note that important data is also stored in the attributes, so use the **XML attribute lists** (p. 243) too for the specific procedure.
- → Insert a new column and enter the corresponding element (or attribute) names from your PMS in the table.
- → Refer to the DTDs to define the structure of the XML documents. Note that each procedure uses different DTDs.
- → The mandatory and optional XML and PDF files for each procedure are listed at the beginning of each section. These are the files you need to produce using your PMS data (except for those files marked as OLF system files).
- → Rename your user-specific PDF attachments to the OLF standard file names. Note that all documents and drawings must be Annex F-compliant.
- → Write and set up your own conversion tool to convert your PMS data into XML for OLF.

3.3 Preparing the package for import

Each procedure in Online Filing requires a specific set of XML and PDF files packed in a ZIP archive file. If you import single applications manually in the OLF client, the files may also be prepared in a specific folder. ZIP is the recommended option, however.

For example, Online Filing expects the following XML files for an application in procedure EP(1001E2K):

| XML file name | DTD | Description |
|----------------------|-------------------------------|---|
| pkgheader.xml | pkgheader.dtd | Indicates selected procedure and other data for transmission to filing office. |
| package-data.xml | package-data.dtd | References attached documents, including those already referenced in application-body.xml file. |
| application-body.xml | application-body-v1- 1.dtd | (a) References attached documents as part of patent specification (technical documents or translations of technical documents into EPO language). |
| | | (b) Contains complete text (or its translation into EPO language) of patent specification with referenced files for drawings. |
| ep-request.xml | ep-request-v1-4.dtd | Application data as entered in Form EP(1001E2K), references other attached documents. |

In a simple EP(1001E2K) application, the technical documents may be attached as multiple PDF files. These are referenced in the *application-body.xml* file with the *document code* (which must always match the EPO document code), the *EPO system file name* and the original file name (as allocated by the user):

| Document code | EPO system file name | Description |
|---------------|----------------------|-------------|
| ABST | ABST.pdf | Abstract |
| CLMS | CLMS.pdf | Claims |
| DESC | DESC.pdf | Description |
| DRAW | DRAW.pdf | Drawings |

(i) See the **Documents** and **Contents** sections for examples of the four procedures.

3.4 Importing XML into Online Filing

You can use one of the following three methods to import XML data into Online Filing:

- 1. Importing applications in the GUI of the OLF client
- 2. Using the PMS Gateway interface
- 3. Calling import/export procedures from the command prompt

OLF client

If you have not already done so, you need to set up a complete installation of the EPO Online Filing system on a dedicated machine.

- → Convert the XML data exported by your PMS into XML data for OLF.
- → Prepare the package with all XML and PDF files to be imported (either a folder or a ZIP archive).
- → Open the OLF *File Manager* and import the application(s) as a new draft.
- → Check if there are any validation messages: use the *Validation* button to display a list of messages about missing or wrong data (where applicable).
- → Complete your application, sign it with your smart card, send it to the EPO and you are done.

PMS Gateway interface

The functionality and installation of the PMS Gateway interface are described in the document *Introduction to the PMS Gateway Interface*, which is part of the *PMS Gateway development kit package*. You can find this package in the Download Centre of the **EPO Online Services website** (http://www.epoline.org).

PMS Gateway uses the OLF Web Services commands which correspond to the basic functionalities of the OLF client:

- validate
- ♦ import
- ◆ sign
- send
- export
- remove
- information

The applications to be imported must be packed as ZIP archives. The PMS sends the package to the PMS Gateway either as a draft or in ready to sign form following successful validation with no severity level 3 messages.

Form EP(1001E2K) - Request for grant of a European patent 4 (EPC 2000)

Structure of XML files for EP(1001E2K) 4.1

The following four XML files are required for an EP(1001E2K) application to be imported:

| File name | DTD | Description |
|----------------------|---|---|
| pkgheader.xml | pkgheader.dtd | Indicates selected procedure and other data for transmission to filing office. |
| package-data.xml | package-data.dtd | References attached documents, except those already referenced in application-body.xml file. |
| application-body.xml | application-body-v1-1.dtd | (a) References attached documents as part of patent specification (technical documents or translations of technical documents into EPO language). |
| | | (b) Contains complete text (or its translation into EPO language) of patent specification with referenced files for drawings. |
| ep-request.xml | ep-request-v1-4.dtd (ep-request-v1-5.dtd under preparation) | Application data as entered in Form EP(1001E2K), references other attached documents. |

I NOTE: The DTD ep-request-v1-4.dtd will be replaced by ep-request-v1-5.dtd in version 4 or later. See the Online Services website (http://www.epoline.org) for further information.

4.1.1 General information on the package - pkgheader.xml

The *pkgheader.xml* specifies the technical details that are necessary for sending an application to the EPO.

```
<?xml version="1.0" encoding="UTF-8"?>
        <!DOCTYPE pkgheader SYSTEM "pkgheader.dtd">
2
3
     □ <pkgheader lang="en" dtd-version="1.0"> 1
4
         <wad-message-digest/>
5
        <transmittal-info>
6
          <new-application> 2
7
          <to>
8
            <country>EP</country>
9
           </to>
10
          </new-application>
11
         </transmittal-info>
         <ip-type>patent</ip-type> 4
12
13
      <application-software>
          <software-name>eOLF</software-name>
14
          <software-version>FMMNGR3189, EP20003190, FM_FOP0205, Help_3.20</software-version> 6

- (3) Filing office
- (4) Kind of IP type
- (5) Name of software used to prepare application
- (6) Version of software
- (7) Name of plug-in used by software
- (8) Type of transmission

4.1.2 References from XML files to other files

All PDF files and other attachments must be referenced directly by the *package-data.xml* file, or by one of the XML files that are referenced in the *package-data.xml* file, i.e. the *application-body.xml* or *ep-request.xml* file. Starting with the forthcoming Version 4 of the software, the EPO Online Filing server will not accept any other files.

package-data.xml file

The *package-data.xml* file references the file names for attached documents in multiple <other-doc> elements using the file and file-type attributes. The document code to be received by the EPO server is contained in the <document-name> element. In addition, the *ep-request.xml* file is referenced in the <application-request> element and the *application-body.xml* file in the <application-body-doc> element.

```
<?xml version="1.0" encoding="UTF-8"?>
         <!DOCTYPE package-data SYSTEM "package-data.dtd">
 2
      package-data lang="en" dtd-version="1.0" produced-by="applicant">

- (8) File type of other document
- (9) Document code of other document
- (10) Additional text, e.g. figure to be published with abstract, number of claims, number of drawings

application-body.xml

The *application-body.xml* file references the files and page numbers for the technical documents in the <doc-page> element, each one within the <description>, <claims>, <abstract> and <drawings> elements, using the id attribute for the document code and the file attribute for the file name.

(i) In this example, four individual files are attached, but there could also be a combined file or an XML document for the technical documents - see the examples in **EP(1001E2K) Documents** (p. 65).

ep-request.xml

The **ep-request.xml** file indicates the document code in the **doc-type** attribute in the **<ep-electronic-files>** element and the file name in the **<epo-file-name>** element. In addition, the original file name as given by the user is contained in the **<applicant-file-name>** element. See the following sections for details and examples.

```

- (3) Original file name
- (4) EPO file name

4.2 Document codes and file types for EP(1001E2K)

For the successful import of XML data into Online Filing, the values for the <document-name> element, the doc-type attribute and the file attribute must follow the standard values for the document code as listed in the table below. Without the correct document code, the receiving server at the EPO can not accept files.

| Document code | EPO file name | Description | | |
|---------------------|---|--|--|--|
| Request | Request | | | |
| APPBODYXML | application-body.xml | Application body, see Structure of XML files for EP(1001E2K) (p. 13) | | |
| REQXML | ep-request.xml | Application data, see Structure of XML files for EP(1001E2K) (p. 13) | | |
| Technical document | ts (or their translations) in o | fficial EPO language (selected procedural language) | | |
| ABST | ABST.pdf | Abstract | | |
| ABSTRACT | ABSTRACT-1.pdf | Abstract (when request refers to a previous application) | | |
| CLMS | CLMS.pdf | Claims | | |
| DESC | DESC.pdf | Description | | |
| DRAW | DRAW.pdf | Drawings | | |
| SPECEPO | SPECEPO.pdf | Technical documents (specification) as a single file | | |
| SPECTRANEPO | SPECTRANEPO.pdf | Single file translated specification from a non-EPO language | | |
| Technical document | ts in non-official EPO langua | age or other languages | | |
| CLMSNONEPO | CLMSNONEPO.pdf | Claims in admissible non-EPO language | | |
| DRAWNONEPO | DRAWNONEPO.pdf | Drawings in admissible non-EPO language | | |
| SPECNONEPO | SPECNONEPO.pdf | Specification in admissible non-EPO language | | |
| Optional additional | files for technical document | s | | |
| OLF-ARCHIVE | OLF-ARCHIVE.zip | Pre-conversion archive (contains original technical documents in any language, before conversion to PDF, e.g. in DOC format) | | |
| Documents concern | ning biological material, sequ | uence listings | | |
| SEQL | SEQLPDF.pdf | Sequence listing in accordance with Rule 30(1) | | |
| SEQLTXT | SEQLTXT.app | Nucleotide and amino acid sequence listing | | |
| SEQLTXT | SEQLTXT.txt | Sequence listing in TXT format (ASCII text) | | |
| BIOMAUTH | BIOM-AUTH-1.pdf | Authorisation under Rule 31(1)(d) | | |
| BIOMRECEIPT | BIOM-RECEIPT-1.pdf | Receipt(s) of deposit issued by depositary institution | | |
| BIOMWAIV | BIOM-WAIV-1.pdf | Waiver of the right to an undertaking from requestor pursuant to Rule 33(2) | | |
| Documents concern | Documents concerning applicant, representative and inventor | | | |
| 1003 | SPECAUTH-1.pdf | Specific authorisation | | |
| 1004 | GENAUTH-1.pdf | General authorisation | | |
| | | | | |

| Graphic files | | | |
|---|---------------------------|--|--|
| | <filename>.jpg</filename> | Drawing in JPG format (referenced by application-body.xml file as a result of attaching specification in XML format) | |
| PATXMLTIF | <filename>.tif</filename> | Drawing in TIF format (referenced by application-body.xml file created by PatXML) | |
| Additional documents | | | |
| PRIOTRAN | PRIOTRAN-1.pdf | Translation of priority documents | |
| REESGROUNDS | REESGROUNDS.pdf | Grounds for re-establishment of rights | |
| SRCH | SRCH-1.pdf | Prior search report | |
| USCERTPRIO | USCERTPRIO-1.pdf | US certified priority document (must be digitally signed) | |
| OTHERPDF | OTHER-1.pdf | Other document in PDF format | |
| Documents generated by Online Filing (not to be imported) | | | |
| F1002 | F1002-1.pdf | Designation of inventor | |
| INVT | EPR193-1.pdf | Waiver - Rule 19(3) EPC / Inventor-related document | |
| INVT | EPR201-1.pdf | Renunciation - Rule 20(1) EPC / Inventor-related document | |
| 1001P | ep-request.pdf | Application in PDF format | |

① If there is more than one file of this type of document, the character 1 in the file names must be replaced by 2, 3 etc.

4.3 EP(1001E2K) Request

Form EP(1001E2K) starts with the *Request* screen where basic data for the application is entered:

- Filing office
- ◆ Procedural language
- Language of filing
- ◆ Title of invention

4.3.1 Request - Example 1: request in English

GUI EP(1001E2K), Request tab

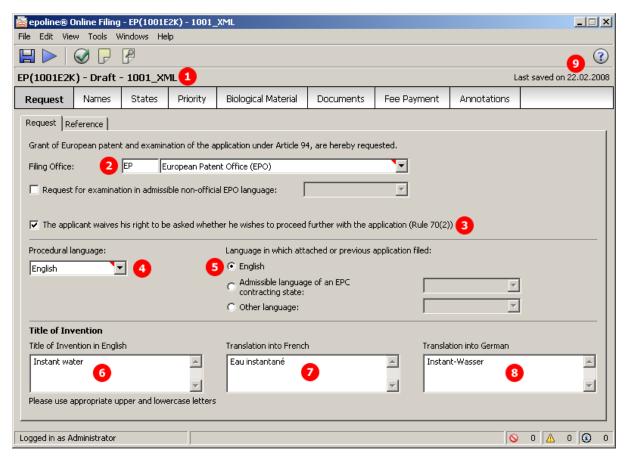

Figure 9: Request GUI: general data

Element list

- (1) User reference
- (2) Filing office
- (3) Waiver Rule 70(2)
- (4) Procedural language
- (5) Language of filing
- (6) Title of invention in English
- (7) Translation (of title of invention) into French
- (8) Translation (of title of invention) into German
- (9) Last saved date: must not be imported, because value will be overwritten by OLF

4.4 EP(1001E2K) Names

The *Names* screen of Form EP(1001E2K) accommodates all data for names, persons and addresses relating to the application. At least one applicant is required.

- Applicant(s)
- ◆ Representative(s)
- Inventor(s)
- Authorisations and waivers
- Address for correspondence

Each address is structured identically in the XML code. See **Example 1** ("Names - Example 1: applicant is natural person and also inventor with same address for correspondence" p. 33) for details.

① If there is a named inventor, a separate *F1002.pdf* file is created with the inventor's address. The inventor's address in XML is listed within the *ep-request.xml* file, however.

4.4.1 Names - Example 1: applicant is natural person and also inventor with same address for correspondence

GUI EP(1001E2K), Names tab

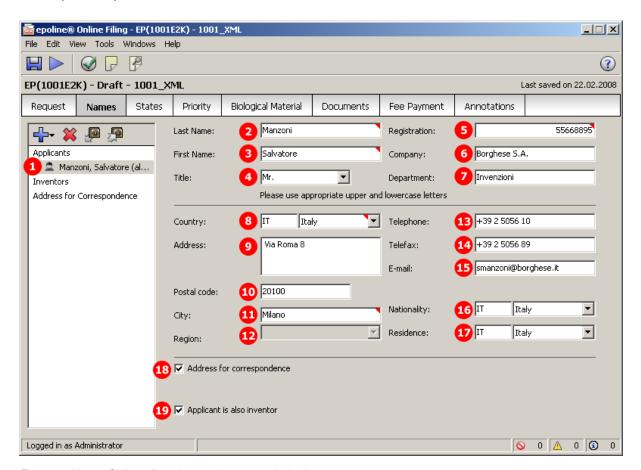

Figure 23: Names GUI: applicant is natural person and also inventor

Element list

The <parties> element contains all the names listed on the left-hand side of the screen and is grouped into <applicants>, <inventors> and <agents>.

Each <applicant>, <ep-inventor> and <ep-agent> element contains one <addressbook> element with the name and address details. In this example, there is only one <ep-applicant> in the <applicants> group.

- (1) Applicant 1
- (2) Last name
- (3) First name
- (4) Title
- (5) Registration number
- (6) Company
- (7) Department
- (8) Country
- (9) Address / street
- (10) Postal code
- (11) City
- (12) Region only applicable to US (US states), GB (GB counties) and other countries with states or regions (Australia, Canada)
- (13) Telephone
- (14) Fax
- (15) E-mail
- (16) Nationality
- (17) Residence
- (18) Address for correspondence: if checked, no representative can be added, but a separate address for correspondence (if different from applicant's address) can be added
- (19) Applicant is also inventor: if checked, inventor's address in the PDF form is copied from applicant's address

PDF ep-request.pdf

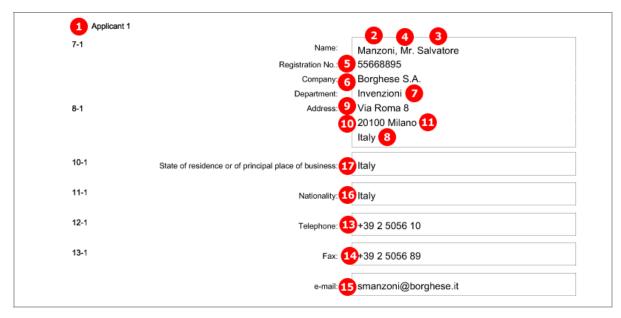

Figure 25: Names PDF: applicant's address

[Page 2]

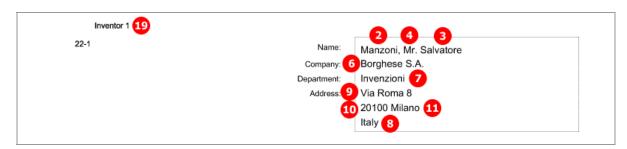

Figure 26: Names PDF: Inventor 1

4.4.2 Names - Example 2: two applicants, two representatives, one inventor

The structure of the names data is basically the same for all persons and is described above in **Example 1** (see "Names - Example 1: applicant is natural person and also inventor with same address for correspondence" p. 33) for the applicant. There are further options for representatives and inventors.

GUI EP(1001E2K), Names tab: second representative

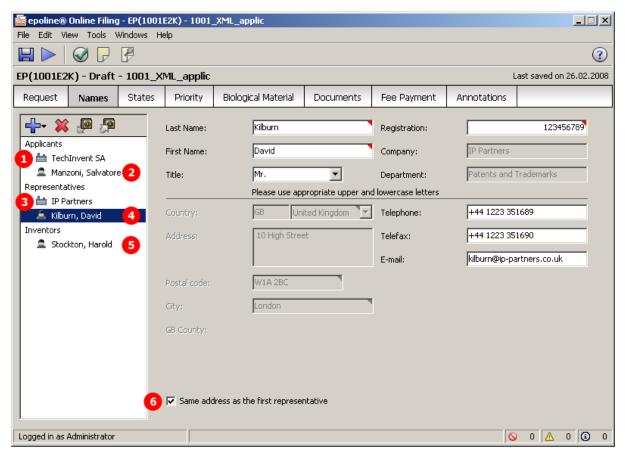

Figure 27: Names GUI: second representative

GUI EP(1001E2K), Names tab: inventor

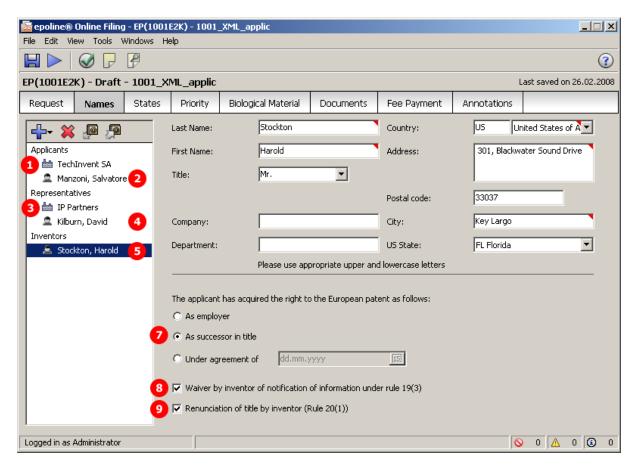

Figure 28: Names GUI: inventor

- (1) Applicant 1
- (2) Applicant 2 (n applicants possible)
- (3) Representative 1
- (4) Representative 2 (n representatives possible)
- (5) Inventor 1 (n inventors possible): for each inventor, a form *F1002-*.pdf* is generated.
- (6) Address of representative 2 is same as for representative 1: if checked, data in XML is inferred from first representative and in PDF form there is no address for representative 2.
- (7) The applicant has acquired the right to the European patent as follows
- (8) Waiver by inventor of notification of information under Rule 19(3): if checked, Online Filing generates form *EPR193-1.pdf Waiver Rule 19(3) EPC*. PDF file is then referenced in *package-data.xml* file.
- (9) Renunciation of title by inventor (Rule 20(1)): if checked, form *EPR201-1.pdf Renunciation Rule* 20(1) *EPC* is generated and referenced in *package-data.xml* file.

The <parties> element contains all the names listed on the left-hand side of the screen and is grouped into <applicants>, <inventors> and <agents>. Each <applicant>, <ep-inventor> and <ep-agent> element contains one <addressbook> element with the name and address details.

The child elements in <addressbook> are listed in **Example 1** (see "Names - Example 1: applicant is natural person and also inventor with same address for correspondence" p. 33) above.

4.5 EP(1001E2K) States

The **States** screen of Form EP(1001E2K) allows applicants to select designated states and extension states for their application.

- ◆ All states or up to six individual states can be selected.
- Different designations can be assigned to different applicants, if there is more than one applicant.
- All extension states or individual extension states can be selected.

① The lists of states in the **Designation** and **Extension** sub-tabs are generated from the Online Filing database and can be retrieved via the **File Manager** in the **Maintenance tables** section. The lists are continuously updated by the EPO.

4.6 EP(1001E2K) Priority

The **Priority** screen in Form EP(1001E2K) is used to enter all priority declarations. The number of national, regional and international priorities is unlimited.

Re-establishment of rights is applicable when the filing date of the priority application is between 12 and 14 months prior to the filing date of the new application.

GUI EP(1001E2K) Priority

Each national, regional and international priority has been entered.

The sample screens show the national priority with the translation option checked and the regional priority with the *re-establishment of rights* option checked.

National priority

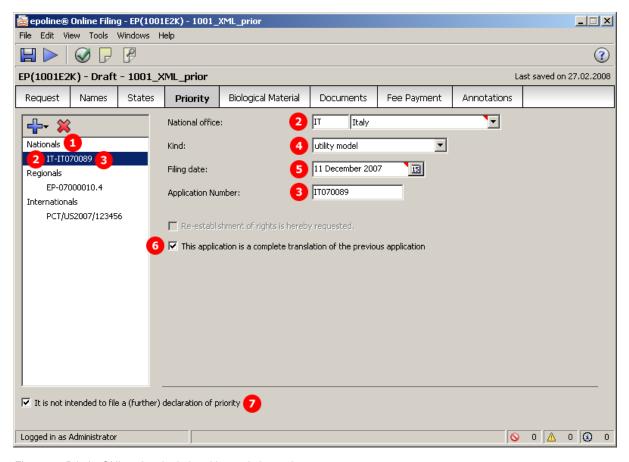

Figure 49: Priority GUI: national priority with translation option

Regional priority

4.7 EP(1001E2K) Biological Material

The EP(1001E2K) **Biological Material** screen is provided to enable applicants to enter all data concerning any biological materials relating to the application.

- Depositary institutions (name and address)
- Accession numbers
- References to patent description
- · Receipts, authorisations and waivers as attached documents
- ① Sequence listings are attached in the **Documents** tab, sub-tab **Sequence listings**.

4.8 EP(1001E2K) Documents

The *Documents* screen in Form EP(1001E2K) offers various combinations for attaching documents. The choices depend on the languages that have been selected in the *Request* tab. For example, if the procedural language has been set to French and the language of the request to Italian, both the original in Italian and the translations of all documents into French must be supplied together with the application.

- The files containing the technical documents are referenced in the *application-body.xml* file.
- ◆ All other documents are referenced in the *ep-request.xml* file.

All attached documents must be **Annex F compliant** (see "Annex F rules for documents and files" p. 235). For more information about preparing documents for attachment and patent specifications in XML format, see the Online Filing User Guide, available from the Download Centre of the **EPO Online Services website** (http://www.epoline.org).

Options in the **Specification** sub-tab:

- ◆ Technical documents in EPO language, i.e. selected procedural language (PDF)
- ◆ Technical documents in EPO language (XML)
- ◆ Technical documents in non-EPO language (PDF)
- ◆ Translation of technical documents from non-EPO language (PDF)
- ◆ Translation of technical documents from non-EPO language (XML)
- Pre-conversion archive (ZIP)

Files to be attached in the **Sequence listing** sub-tab:

- Sequence listing in PDF format
- Sequence listing in APP or TXT format

Options in the Additional documents sub-tab (all files must be in PDF format):

- General authorisation
- Specific authorisation
- Translation of priority documents
- · Grounds for re-establishment of rights
- US certified priority document (digitally signed)
- Prior search report
- Other documents

(i) See the list of standard document names required by the EPO in **Document codes and file types for EP(1001E2K)** (p. 18).

4.8.1 Specification - Example 1: request in English, technical documents in one PDF file

GUI EP(1001E2K) Documents, Specification sub-tab

The technical documents in English are attached in one PDF file, the claims will be filed later.

4.8.4 Specification - Example 4: request in admissible non-official EPO language

GUI EP(1001E2K) Documents, Specification sub-tab

The technical documents in Italian have been attached in PDF format. This file contains the description, claims and abstract. An extra PDF file has been attached for the drawings in Italian.

The translations into French for both files, specification and drawings, have also been attached in PDF format.

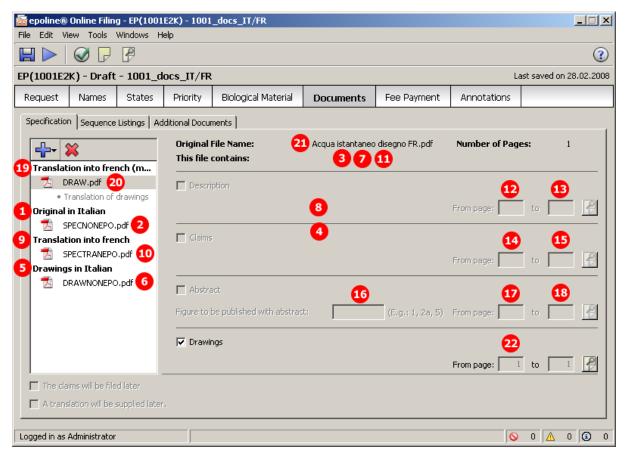

Figure 73: Documents GUI: technical documents and drawings in Italian and their translations into French are attached

- (1) Technical documents in Italian
- (2) EPO file name for specification in non-EPO language
- (3) Original file name for technical documents (shows in GUI when SPECNONEPO.pdf is selected)
- (4) Number of claims in original document (shows in GUI when SPECNONEPO.pdf is selected)
- (5) Drawings in Italian
- (6) EPO file name for drawings in non-EPO language
- (7) Original file name for drawings (shows in GUI when DRAWNONEPO.pdf is selected)
- (8) Number of figures in drawings file (shows in GUI when DRAWNONEPO.pdf is selected)
- (9) Translation of technical documents into French
- (10) EPO file name for translation of specification into EPO language
- (11) Original file name for translation (shows in GUI when SPECTRANEPO.pdf is selected)
- (12) First page of description in translation document
- (13) Last page of description in translation document
- (14) First page of claims in translation document
- (15) Last page of claims in translation document
- (16) Figure to be published with abstract
- (17) First page of abstract in translation document
- (18) Last page of abstract in translation document
- (19) Translation of drawing into French
- (20) EPO file name for drawings in EPO language
- (21) Original file name for translated drawings
- (22) Page count of translated drawings file: in this case, there is only one page, therefore the attributes ppf and ppl do not exist in the XML file

4.9 EP(1001E2K) Fee Payment

The *Fee Payment* screen in Form EP(1001E2K) allows applicants to enter payment details for fees charged by the EPO. The fee selection is set automatically by the software; users can also select additional fees manually.

(i) You can retrieve the current fee schedule under **Tools > Fee Management** in the Online Filing File Manager or under **Schedule of Fees** on the EPO's **Online Services website** (http://www.epoline.org) (login with username or smart card).

4.9.1 Fee selection

GUI EP(1001E2K) Fee payment, Fee selection sub-tab

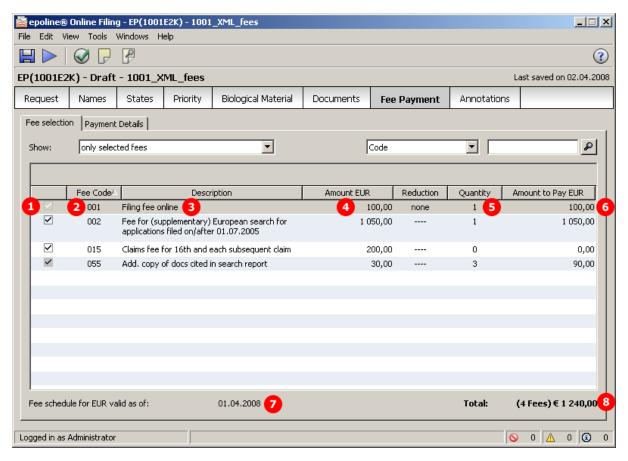

Figure 84: Fee Payment GUI: selected fees only displayed

- (1) Fee selected
- (2) Fee code
- (3) Fee description (not stored in XML file)
- (4) Fee schedule = one fee
- (5) Fee factor: if there is a reduction, the number of fees as indicated in the GUI is multiplied by the reduction factor
- (6) Fee amount to pay = fee schedule x fee factor
- (7) Date of fee schedule validity
- (8) Total sum of fees in EUR

NOTE: The <fee-schedule> element is used for the (calculated) fee amount and the <fee-sub-amount> element contains the fee schedule (for one single fee).

Only the values from the <fee-factor>, <fee-schedule> and <fee-sub-amount> elements are imported into Online Filing; the software does not carry out any calculations.

The current fee tables can be downloaded from the EPO's **Online Services website** (http://www.epoline.org) under **Schedule of Fees** (login with username or smart card).

XML ep-request.xml

All the fees applicable to this procedure are listed in full by default in the XML file. The attribute topay in the <fee> element takes the value yes if this specific fee has been selected.

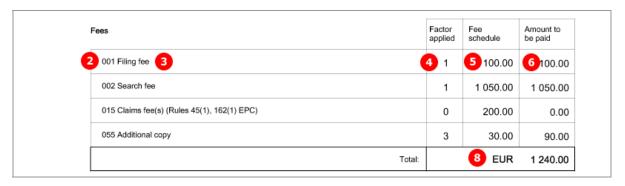

Figure 86: Fee Payment PDF: selected fees are listed in form

4.9.2 Payment details

GUI EP(1001E2K) Fee payment, Payment details sub-tab

There are different options for the mode of payment. If *automatic debit order* is selected, the *Fee selection* sub-tab does not display any fees. Likewise, the PDF form does not contain any fee lists, but the fees will be included in the XML data.

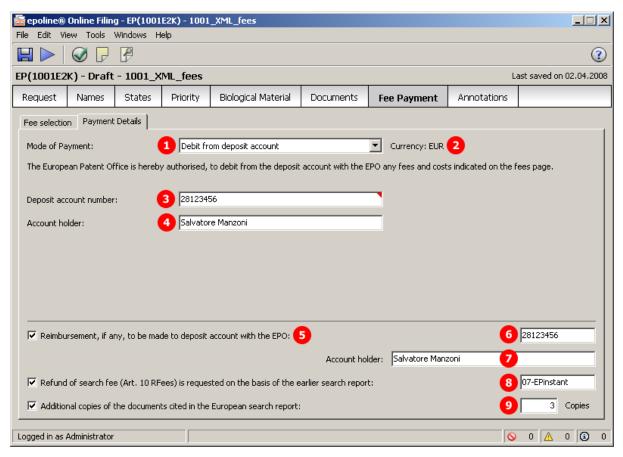

Figure 87: Fee Payment GUI: payment details

5 Form Euro-PCT(1200E2K) - Entry into the European phase (EPC 2000)

5.1 Structure of XML files for Euro-PCT(1200E2K)

The following four XML files are required for a Euro-PCT(1200E2K) application to be imported:

| File name | DTD | Description | |
|----------------------|---------------------------|--|--|
| pkgheader.xml | pkgheader.dtd | Indicates selected procedure and other data for transmission to receiving office. | |
| package-data.xml | package-data.dtd | References attached documents, except those already referenced in application-body.xml file. | |
| application-body.xml | application-body-v1-1.dtd | References attached documents as part of patent specification (amendments or translations of technical documents). | |
| ep-euro-pct.xml | ep-euro-pct-v1-02.dtd | Application data as entered in Form Euro-PCT(1200E2K), references other attached documents. | |

Unlike in EP(1001E2K), the technical documents (patent specification) cannot be attached in XML format. This is why the *application-body.xml* file is only used for referencing attached files and does not contain any additional text.

The XML structure of the *pkgheader.xml*, *package-data.xml* and *application-body.xml* files is the same as for EP(1001E2K) applications - see **General information on the package - pkgheader.xml** (p. 14) and **References from XML files to other files** (p. 15).

More information on the XML structure of the *ep-euro-pct.xml* file can be found in the following sections.

5.2 Document codes and file types for Euro-PCT(1200E2K)

For the successful import of XML data into Online Filing, the values for the <document-name> element, the doc-type attribute and the file attribute, must follow the standard values for the document code as listed in the table below.

| Document code | EPO file name | Description | | | | |
|---------------------------|---|--|--|--|--|--|
| Request | | | | | | |
| APPBODYXML | application-body.xml | Application body, see Structure of XML files for Euro-PCT(1200E2K) (p. 97) | | | | |
| EP1200XML | ep-euro-pct.xml | Application data, see Structure of XML files for Euro-PCT(1200E2K) (p. 97) | | | | |
| Amendments | | | | | | |
| AMSPECEPO | AMSPECEPO.pdf | Amended specification (contains at least description and abstract) | | | | |
| AMDESC | AMDESC.pdf | Amended description | | | | |
| AMCLMS | AMCLMS.pdf | Amended claims | | | | |
| AMABST | AMABST.pdf | Amended abstract | | | | |
| AMDRAW | AMDRAW.pdf | Amended drawings | | | | |
| AMCLMSTRAN | AMCLMSTRAN.pdf | Translation of amended claims (only applicable when EPO as designated office is selected) | | | | |
| Translations | | | | | | |
| SPECTRANEPO | SPECTRANEPO.pdf | Translation of international application (contains at least description and abstract) | | | | |
| DESCTRAN | DESCTRAN.pdf | Translation of description as originally filed | | | | |
| CLMSTRAN | CLMSTRAN.pdf | Translation of claims as originally filed | | | | |
| ABSTTRAN | ABSTTRAN.pdf | Translation of abstract as published | | | | |
| DRAWTRAN | DRAWTRAN.pdf | Translation of any text in drawings as originally filed | | | | |
| Optional additional files | for technical documents | | | | | |
| OLF-ARCHIVE | OLF-ARCHIVE.zip | Pre-conversion archive (contains original technical documents in any language, before conversion to PDF, e.g. in DOC format) | | | | |
| Documents concerning | Documents concerning biological material, sequence listings | | | | | |
| SEQL | SEQLPDF.pdf | Sequence listing in accordance with Rule 30(1) | | | | |
| SEQLTXT | SEQLTXT.app | Nucleotide and amino acid sequence listing | | | | |
| SEQLTXT | SEQLTXT.txt | Sequence listing in TXT format (ASCII text) | | | | |
| BIOMRECEIPT | BIOM-RECEIPT-1.pdf | Receipt(s) of deposit issued by depositary institution | | | | |
| BIOMWAIV | BIOM-WAIV-1.pdf | Waiver of right to an undertaking from requestor pursuant to Rule 33(2) | | | | |

| Additional documents | | | | | |
|--|------------------|---|--|--|--|
| 1003 | SPECAUTH-1.pdf | Specific authorisation | | | |
| 1004 | GENAUTH-1.pdf | General authorisation | | | |
| USCERTPRIO | USCERTPRIO-1.pdf | US certified priority document (must be digitally signed) | | | |
| OTHERPDF | OTHER-1.pdf | Other document in PDF format | | | |
| Internal documents generated by Online Filing (not to be imported) | | | | | |
| 1200P | epf1200.pdf | Application in PDF format | | | |

⁽i) If there is more than one file of this type of document, the character 1 in the file names must be replaced by 2, 3, etc.

5.3 Euro-PCT(1200E2K) EP Phase

5.3.1 EP Phase - Example 1: EPO as designated office

Form Euro-PCT(1200E2K) starts with the *EP Phase* screen, where the roles for the EPO are selected and the data referring to the previous application is entered.

GUI EP(1200E2K) EP Phase

5.4 Euro-PCT(1200E2K) Names

The XML structure for the names in the **ep-euro-pct.xml** file is basically the same as in the **ep-request.xml** file.

The <parties> element can contain <applicants> and <agents> (representative) elements, each with multiple <applicant> and <ep-agent> sub-elements - see also Example 2 ("Names - Example 2: two applicants, two representatives, one inventor" p. 37) in the Names section for Form EP(1001E2K).

If an address for correspondence has been entered for the applicant, no representative can be added, and vice versa.

5.4.1 Names - Example 1: One applicant, one representative with authorisation

GUI Euro-PCT(1200E2K) Names, representative 1

5.4.2 Names - Example 2: Applicant is represented by employee

In this example, an employee is acting as a representative on behalf of the applicant. No other representative can be added. The address for correspondence is the applicant's address. The **<address>** element within the **<applicant>** element for the employee is empty, since it is inferred that employee and applicant have the same address.

5.5 Euro-PCT(1200E2K) States

The XML structure in the *ep-euro-pct.xml* file is similar to that of the *ep-request.xml* file, see also **EP(1001E2K) States** (p. 46) for further details.

In the example below, six states have been designated and all current extension states are selected.

| 10. Designation fees | |
|--|------------|
| All the contracting states party to the EPC at the time of filing of the international patent application and designated in the international application are deemed to be designated (see Article 79(1) EPC). | |
| 10.1 It is currently intended to pay fewer than seven designation fees, for the following contracting states: | |
| 2 3 4 5 6 7 8 AT CH DE HR IT SI LI | I |
| 10.2 If contracting states are indicated in Section 10.1, it is agreed that for the contracting states not thus indicated no communication under Rule 112(1) EPC be issued and further processing be excluded. | ∞ 9 |
| 11. Extension of the European patent | |
| This application is deemed to be a request to extend the European patent application and the European patent granted in respect of it to all the non-contracting states to the EPC designated in the international application and with which extension agreements are in force on the date on which the international application is filed. However, the extension only takes effect if the prescribed extension fee is paid. | ₩ |
| It is currently intended to pay the extension fee for the following states: | |
| AL BA MK RS | |
| 11 12 13 14 | |
| Note: Under the automatic debiting procedure, extension fees will only be debited for states indicated here, unless the EPO is instructed otherwise before expiry of the period for payment. | |

5.7 Euro-PCT(1200E2K) Documents

The *Documents* screen in Form Euro-PCT(1200E2K) allows applicants to attach documents containing translations or amendments to parts of the previously filed application and other documents. The choices depend on the EPO role selected in the *EP Phase* tab and the settings for amendments in the *Proceedings* sub-tab.

- The files containing amendments or translations of technical documents are referenced in the applicationbody.xml file.
- ◆ All other documents are referenced in the *ep-euro-pct.xml* file.

All attached documents must be **Annex F** compliant. For more information about preparing documents for attachment and patent specifications in XML format, see the Online Filing User Guide, which is available from the Download Centre of the **EPO Online Services website** (http://www.epoline.org).

Options in the Amendments and Translations sub-tab:

- ◆ Amendments (multiple PDF)
- Amendments
- ◆ Translation of international application
- ◆ Translation (multiple PDF) of international application
- ◆ Translation of amended claims
- ◆ Translation of priority applications
- ◆ Pre-conversion archive (ZIP)

Files to be attached in the **Sequence listing** sub-tab:

- Sequence listing in PDF format
- ◆ Sequence listing in APP or TXT format

Options in the Additional documents sub-tab (all files must be in PDF format):

- Authorisation
- ◆ Specific authorisation
- US certified priority document (digitally signed)
- Other documents
- (i) See the list of document names required by the EPO in **Document codes and file types for Euro-PCT(1200E2K)** (p. 98).

5.7.1 Proceedings

In the *Proceedings* sub-tab of the *Documents* screen in Euro-PCT(1200E2K), general settings and declarations are made.

- The option *Enclosed amendments* must be checked if you wish to attach documents containing amendments.
- ◆ The option under *Use of test reports* is automatically checked (and can not be un-checked) if the options *EPO as elected office* and *IPEA is EPO* are selected in the *EP Phase* screen.

Figure 116: Documents XML: options for proceedings

| Documents intended for proceedings before the EPO | |
|---|------------|
| 6.1 Proceedings before the EPO as designated Office (PCT I) are to be based on the following documents: | |
| the application documents published by the International Bureau (with all claims, description and drawings), where applicable with amended claims under Art. 19 PCT | |
| unless replaced by the amendments attached. | |
| Where necessary, clarifications should be attached as 'Other documents' | |
| 6.2 Proceedings before the EPO as elected Office (PCT II) are to be based on the following documents: | |
| the documents on which the international preliminary examination report is based, including any annexes | |
| unless replaced by the amendments attached. | |
| Where necessary, clarifications should be attached as 'Other documents' | |
| If the EPO as International Preliminary Examining Authority has been supplied with test reports, these may be used as the basis of proceedings before the EPO. | ≥ 2 |
| 7. Translations | |
| Translations in one of the official languages of the EPO (English, French, German) are attached as crossed below: | |
| * In proceedings before the EPO as designated or elected Office (PCT I + II): | _ |
| Translation of the international application (description, claims, any text in the drawings) as originally filed, of the abstract as published and of any indication under Rule 13bis.3 and 13bis.4 PCT regarding biological material | |
| Translation of the priority application(s) (to be filed only at the EPO's request, Rule 53(3) EPC) | |
| It is hereby declared that the international application as originally filed is a complete translation of the previous application (Rule 53(3) EPC) | ⊠ 3 |
| * In addition, in proceedings before the EPO as designated Office (PCT I): | _ |
| Translation of amended claims and any statement under Art. 19 PCT, if the claims as amended are to form the basis for the proceedings before the EPO (see Section 6). | |
| * In addition, in proceedings before the EPO as elected Office (PCT II): | |
| Translation of annexes to the international preliminary examination report | |

Figure 117: Documents PDF: documents for proceedings and translations

5.7.2 Documents - Example 1: Amendments

Amendments can be attached as one combined file or multiple PDF documents. In this example, a combined file contains the amended description and the amended claims, and two separate files are attached for the amended abstract and the amended drawings. In addition, a document with translations of amended claims is provided.

| The sequence listing as part of the description is attached: In computer-readable format in accordance | sequence_instant_water.app | 6 | SEQLTXT.app |

Figure 130: Documents PDF: list of enclosed documents with sequence listings

5.7.5 Additional documents

The additional documents that can be attached to a Euro-PCT(1200E2K) application are:

- Authorisations
- Specific authorisations
- US certified priority documents
- ◆ Other documents

The XML structure and file types are identical with those for EP(1001E2K), see **Additional documents** (p. 84) for further details.

5.8 Euro-PCT(1200E2K) Fee Payment

The *Fee Payment* screen in Form Euro-PCT(1200E2K) allows applicants to enter payment details for the fees charged by the EPO. The fee selection is set automatically by the software; users can also select additional fees manually.

① You can retrieve the current fee schedule under *Tools* > *Fee Management* in the Online Filing File Manager or under *Schedule of Fees* on the EPO's Online Services website (http://www.epoline.org) (login with username or smart card).

5.8.1 Fee selection

The example below shows an application with the EPO as designated office, with 17 claims, all designated states and amended documents attached.

GUI Euro-PCT(1200E2K) Fee payment, Fee selection sub-tab

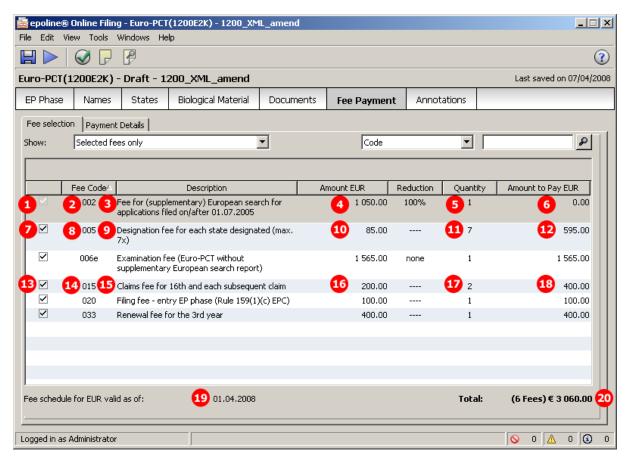

Figure 131: Fee Payment GUI: selected fees and total amount to pay

- (1) Fee selected
- (2) Fee code 002
- (3) Fee description (not stored in XML file)
- (4) Fee schedule = one fee
- (5) Fee factor: if there is a reduction, the quantity of fees as indicated in the GUI is multiplied by the reduction factor. In this example, the reduction is 100%, which means the factor is 0 (zero).
- (6) Fee amount to pay = fee schedule x fee factor
- (7) Fee selected
- (8) Fee code 005
- (9) Fee description (not stored in XML file)
- (10) Fee schedule = one fee
- (11) Fee factor: quantity of fees as indicated in GUI is multiplied by fee schedule
- (12) Fee amount to pay = fee schedule x fee factor
- (13) Fee selected
- (14) Fee code 015
- (15) Fee description (not stored in XML file)
- (16) Fee schedule = one fee
- (17) Fee factor = number of claims as indicated in EP Phase GUI 15 (fee must be paid for 16th and each subsequent claim)
- (18) Fee amount to pay = fee schedule * fee factor
- (19) Date of fee schedule validity
- (20) Total sum of fees in EUR

NOTE: The <fee-schedule> element is used for the (calculated) fee amount and the <fee-sub-amount> element contains the fee schedule (for one single fee).

Only the values from the <fee-factor>, <fee-schedule> and <fee-sub-amount> elements are imported into Online Filing; the software does not carry out any calculations.

The current fee tables can be downloaded from the **EPO's Online Services website** (http://www.epoline.org) under **Schedule of Fees** (login with username or smart card).

6 Form EP(1038E) - Subsequently filed documents

6.1 XML files for an EP(1038E) application

(i) Unlike in EP(1001E2K) and Euro-PCT(1200E2K), there is no application-body.xml file.

| File name | DTD | Description |
|--------------------|-------------------------|--|
| pkgheader.xml | pkgheader.dtd | Indicates selected procedure and other data for transmission to filing office. |
| package-data.xml | package-data.dtd | References attached documents including epsfd-request.xml file. |
| ep-sfd-request.xml | ep-sfd-request-v2-0.dtd | Application data as entered in Form EP(1038E), references attached documents. |

The XML structure of the *pkgheader.xml* and *package-data.xml* files is the same as for EP(1001E2K) applications - see sections **General information on the package - pkgheader.xml** (p. 14) and **References from XML files to other files** (p. 15).

More information on the XML structure of the *ep-sfd-request.xml* file can be found in the following sections.

6.2 Document codes and file types for EP(1038E)

 ${\sf EP(1038E)} \ allows \ applicants \ to \ attach \ many \ different \ document \ types, \ all \ of \ which \ are \ subject \ to \ legal \ modifications \ to \ the \ procedure.$

| Document code | EPO file name | Description |
|------------------|-------------------------|--|
| Request | | |
| REQXML | ep-sfd-request.xml | Application data, see table above |
| PDF Attachments, | in alphabetical order (| the file name extension is always .pdf) |
| 1003 | 1003-1 | Authorisation of representative |
| 1005 | 1005-1 | Request for accelerated search/examination |
| 1007E | UPP1007-1 | UPP participation request |
| ABEX | ABEX-1 | Amendments before examination |
| ABSTMOD | ABSTMOD-1 | Modified abstract |
| APPRASSI | APPRASSI-1 | Request for assignment |
| APPRCHOA | APPRCHOA-1 | Request for change of address |
| APPRCHON | APPRCHON-1 | Request for change of name |
| APPRMISC | APPRMISC-1 | Document concerning applicant |
| BIOM | BIOM-1 | Document concerning micro-organisms and medical inventions |
| CLMS | CLMS-1 | Claims |
| CLMSPAMD | CLMSPAMD-1 | Amended claims |
| CLMSTRAN | CLMSTRAN-1 | Translation of claims |
| CORI | CORI-1 | Request for correction after communication under Rule 71(3) EPC |
| DECA | DECA-1 | Automatic debiting |
| DESCNEW | DESCNEW-1 | Missing parts of description |
| DESCPAMD | DESCPAMD-1 | Amended description |
| DEST | DEST-1 | Document concerning designation and extension of states |
| DRAW | DRAW-1 | Drawings |
| DRAWNEW | DRAWNEW | Missing parts of drawings |
| DRAWPAMD | DRAWPAMD-1 | Amended drawings |
| ENQUIRY | ENQUIRY-1 | General enquiry |
| EPLETT | EPLETT-1 | Letter relating to search and examination procedure |
| EXAM | EXAM-1 | Document filed during examination procedure earlier than EXRE1 |
| EXAMREQ | EXAMREQ-1 | Request for examination |
| EXRE3 | EXRE3-1 | Reply to examination report |
| EXRE92 | EXRE92-1 | Request for extension of time limit during examination procedure |
| FEES | FEES-1 | Document concerning fees and payments |
| FICO | FICO-1 | Request for certified copies of application |
| FREP | FREP-1 | Document concerning representation |

| Document code | EPO file name | Description | |
|----------------------------------|--|--|--|
| IGRA | IGRA-1 | Reply to communication under Rule 71(3) EPC | |
| INVT | INVT-1 | Documents concerning inventorship | |
| IPERTRAN | IPERTRAN-1 | Translation of international preliminary examination report | |
| MEPA | MEPA-1 | Maintenance of application | |
| MUCLMS | UPPMUCLMS-1 | Marked-up priority claims | |
| NATER | UPPNATER-1 | National examination report | |
| NATSR | UPPNATSR-1 | National search report | |
| NATWO | UPPNATWO-1 | National written opinion | |
| ORAL | ORAL-1 | Letter dealing with oral proceedings | |
| ORALWDRA | ORALWDRA-1 | Withdrawal of request for oral proceedings | |
| PRIO | PRIO-1 | Document concerning priority claims | |
| PRIOTRAN | PRIOTRAN-1 | Translation of priority documents | |
| R88 | R88-1 | Rule 139: Request for correction of documents | |
| RDEC | RDEC-1 | Request for decision | |
| REES | REES-1 | Request for re-establishment of rights/restitutio in integrum | |
| REESGROUNDS | REESGROUNDS-1 | Grounds for re-establishment of rights/restitutio in integrum | |
| RFPR | RFPR-1 | Request for further processing | |
| SEQL | SEQL-1 | Document concerning sequence listing | |
| SRCH | SRCH-1 | Document concerning search matters | |
| SUBCLMS | CLMS-2 | Subsequently filed claims | |
| SUSI | SUSI-1 | Request for suspension/interruption of procedure | |
| TIMEEXTREQ | TIMEEXTREQ-1 | Request for extension of time limit during search procedure | |
| TRANEAPP | TRANEAPP-1 | Translation of previously filed application | |
| USCERTPRIO | USCERTPRIO-1 | US priority document in electronic format | |
| USTCHOR | USTCHOR-1 | Request for change of representative | |
| USTTOR | USTTOR-1 | Request for transfer of rights | |
| WDRA | WDRA-1 | Withdrawal of application | |
| WDRADEST | WDRADEST-1 | Withdrawal of designated or extension states | |
| Text file attachments (TXT, APP) | | | |
| BIOM | BIOM-1.app | Documents concerning microorganisms and medical inventions in APP format | |
| SEQLTXT | SEQLTXT-1.txt | Sequence listings in TXT format | |
| Internal documents | Internal documents generated by Online Filing (not to be imported) | | |
| 1038 | epf1038.pdf | Application in PDF format | |

⁽i) Where there is more than one file of this type of document, the character 1 in the file names must be replaced by 2, 3 etc.

6.3 EP(1038E) Application number

Only the EP application number needs to be entered in the *Application No* screen. The other data is inferred by Online Filing, but has to be included in the XML files.

6.4 EP(1038E) Names

In the *Names* screen of Form EP(1038E), multiple applicants and representatives can be added. Inventors or an address for correspondence cannot be added.

The XML structures of the <agent> element and the <applicant> element are the same as in **EP(1001E2K)** (see "Names - Example 1: applicant is natural person and also inventor with same address for correspondence" p. 33).

In the example below, a new representative has been added.

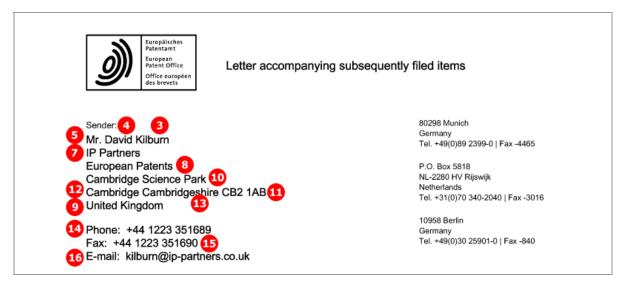

Figure 145: Names PDF: representative's address

6.5 EP(1038E) Documents

The menu for adding files in the *Documents* screen of Form EP(1038E) is grouped into the following categories:

- 1. All documents
- 2. Amendments
- 3. Applicant-representative-inventor
- 4. Biology
- 5. Fees
- 6. Forms
- 7. Legal remedies
- 8. Other
- 9. Priorities
- 10. Replies
- 11. Request
- 12. Withdrawals
- 13. Filing
- 14. UPP

These groups are not reflected in the XML structure. Their principal purpose is to help Online Filing users select the right file type.

!

NOTE: The electronic filing of documents relating to appeal, opposition, limitation, revocation and review proceedings is not yet admissible.

To keep it simple, the example below shows two attached documents only: an authorisation of representative and a document concerning representation. The total number of files to be attached is NOT limited.

GUI EP(1038E) Documents

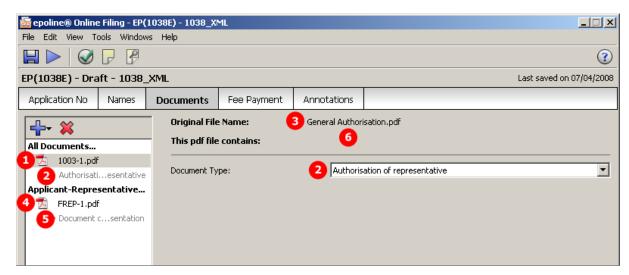

Figure 146: Documents GUI: individual files attached

6.6 EP(1038E) Fee Payment

Unlike in EP(1001E2K) and Euro-PCT(1200E2K), fees are not automatically selected in the *Fee Payment* screen of form EP(1038E). Online Filing users need to manually check the specific fees that they want to pay. The reduction and the fee amount can be modified in the GUI. For the data in the XML file, however, this is not significant, because the <fee-sub-amount>, <fee-factor> and <fee-schedule> elements just have to be filled using the appropriate values.

NOTE: The <fee-schedule> element is used for the (calculated) fee amount and the <fee-sub-amount> element contains the fee schedule (for one single fee).

(i) The current fee tables can be downloaded from the **EPO's Online Services website** (http://www.epoline.org) under **Schedule of Fees** (login with username or smart card).

6.6.1 Fee selection

GUI EP(1038E) Fee Payment, Fee selection sub-tab

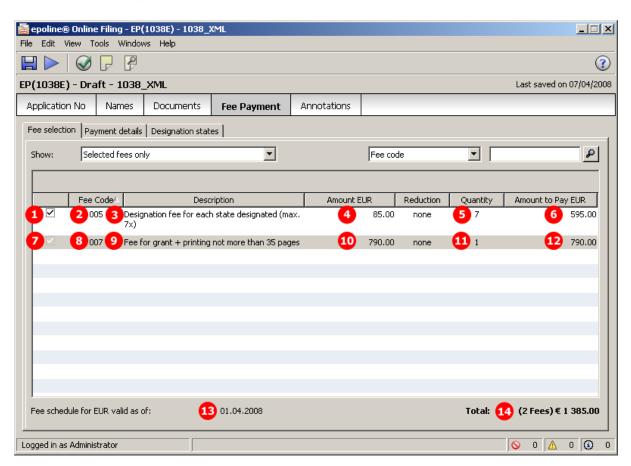

Figure 149: Fee Payment GUI: selected fees

- (1) Fee selected
- (2) Fee code 005
- (3) Fee description (not stored in XML file)
- (4) Fee schedule = one fee
- (5) Fee factor (quantity): quantity of fees as indicated in GUI is multiplied by fee schedule
- (6) Fee amount to pay = fee schedule x fee factor
- (7) Fee is selected
- (8) Fee code 007
- (9) Fee description (not stored in XML file)
- (10) Fee schedule = one fee
- (11) Fee factor
- (12) Fee amount to pay = fee schedule x fee factor
- (13) Date of fee schedule validity
- (14) Total amount of fees to pay
- (15) List of designation states (countries selected in *Designation states* sub-tab in *Fee Payment* screen)

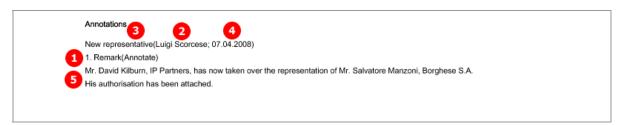

Figure 160: Annotations PDF: Remark 1 (note to EPO)

7 PCT/RO/101

7.1 Structure of XML files for PCT/RO/101

The applicable DTDs for the most recent version of PCT/RO/101 can be found in a sub-folder of the **lepoline3\dtd** folder (the folder with the highest version number). For example, at the time of writing the most recent version of the sub-folder was **\dtd\1.5**.

The following XML files are required in order to import PCT/RO/101 applications:

| File name | DTD | Description |
|-------------------------------------|---------------------------------|--|
| Mandatory files | | |
| pkgheader.xml | pkgheader-v1-4.dtd | Indicates selected procedure and other data for transmission to receiving office. |
| package-data.xml | package-data-v1-4.dtd | References attached documents, except those already referenced in application-body.xml or other XML files. |
| application-body.xml | application-body-v1-4.dtd | (a) References attached documents as part of international application.(b) Contains complete text of patent specification with referenced files for drawings. |
| request.xml | request-v1-4.dtd | Application data as entered in Form PCT/RO/101, references other attached documents. |
| fee-sheet.xml | fee-sheet-v1-4.dtd | Lists all selected fees and contains details of mode of payment. |
| Optional files | | |
| declaration.xml | declaration-v1-4.dtd | Contains details and/or full text of declarations (five standard declarations possible). |
| indication-bio-deposit.xml | indication-bio-deposit-v1-3.dtd | Contains details of biological materials as indicated in application. |
| power-of-attorney.xml | power-of-attorney-v1-4.dtd | (a) Contains details of attorney and signature of applicant.(b) References attached document containing general or separate power of attorney. |
| Internal files (not to be imported) | | |
| validation-log.xml | validation-log-v0-1.dtd | Lists Online Filing validation messages. |

- The XML structure of the application-body.xml file is similar to EP(1001E2K) applications (see "References from XML files to other files" p. 15). Examples for PCT/RO/101 are given in the sections below.
- All details of the XML structure of the *request.xml* file can be found in the following sections.
- ◆ Code examples explaining some elements of the *package-data.xml* file are included in the PCT/RO/101 Contents (p. 208) section.
- ◆ The *fee-sheet.xml* file is always part of the package.
- ◆ The **declaration.xml**, **power-of-attorney.xml** and **indication-bio-deposit.xml** files are only part of the package if there are data concerning declarations, authorisations or biological materials in the application.
- ◆ The *validation-log.xml* file is not necessary for importing an application. It is created internally by Online Filing.

General information on the package - pkgheader.xml file

The *pkgheader.xml* file contains basic information about the transmission and details of the software used to prepare and send the application.

① The complete <transmittal-info> element is contained in the package-data.xml file in identical form.

- (13) Name of plug-in used by software
- (14) Type of transmission
- (15) WAD message must not contain any data

7.2 Document codes and file types for PCT/RO/101

The table lists the values for the <document-code> elements inside the <transmittal-info> element in the *pkgheader.xml* and *package-data.xml* files. The same values apply for the <document-name> elements inside the <other-doc> elements in the *package-data.xml* file.

In most cases, the EPO file takes the original file name allocated by the user.

Without the correct document code, the receiving server at the EPO will not accept the files. There is no error message, however.

| Document code | EPO file name | File type | Description |
|---------------|-----------------------------------|-----------|---|
| 2018 | application-body | XML | Application body XML: additional <document-code>2018</document-code> element is required in <other-doc> element in package-data.xml file; see Contents - Example 2: Specification attached in XML format (p. 213)</other-doc> |

PDF Pct101.PDF

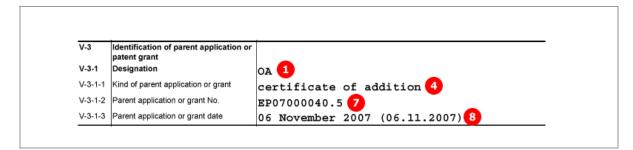

Figure 171: States PDF: designation of OAPI for parent application or patent grant

7.4.3 States - Example 3: References to parent application or grant - National designation

In this example, individual states are selected for national parent applications or grants. The current list of all PCT contracting states is available for download from the **WIPO website** (http://www.wipo.int).

① Different options are available for the kind of national parent application or grant in the different countries.

Figure 186: Names XML: data for agent 1 and agent 2

PDF Pct101.PDF

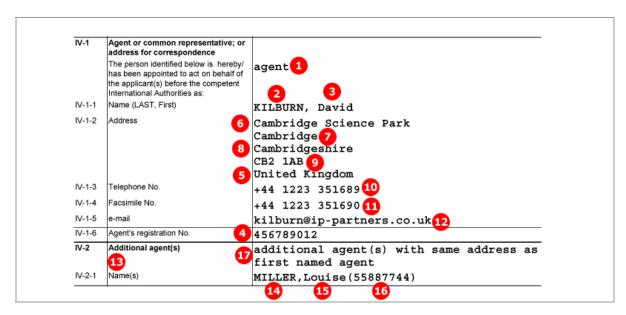

Figure 187: Names PDF: agent and additional agent

7.5.4 Power of attorney

An applicant/inventor and an agent are indicated in the **Names** GUI. The applicant has signed a separate power of attorney for his agent, which is attached as an XML file named **power-of-attorney.xml**. In the Online Filing GUI, this special file appears as **original separate power of attorney** in the **Accompanying items** sub-tab of the **Contents** screen, right after the signature has been applied within the **Names** GUI.

The reference to the power of attorney file is described in **Contents - Example 2: Specification attached in XML format** (p. 213).

7.7 PCT/RO/101 Biology

The data on deposited microorganisms/biological material is contained in the separate *indication-bio-deposit.xml* file.

This XML file is referenced by the <biological-material> element and an <other-doc> element in the package-data.xml file.

The number of biological materials is indicated by the <cl-biological-material> element within the <check-list> element in the *request.xml* file. The number of sequence listings and sequence tables are indicated by the <cl-sequence-listing> and <cl-sequence-listing-table> elements.

The files containing sequence listings and tables are attached in the **Contents** GUI. However, these options are only available there if the two check-boxes (12,13) have been ticked in the **Biology** GUI. The attachments are also referenced in the **request.xml** and **package-data.xml** files.

In the example below, one biological material item has been added to the application. A sequence listing in APP format and a sequence listing table in PDF format have been attached additionally.

7.8 PCT/RO/101 Declarations

PCT/RO/101 offers five different declarations. Each declaration can be made more than once:

- 1. Declaration as to identity of inventor
- 2. Declaration as to applicant's entitlement to apply for and be granted a patent
- 3. Declaration as to applicant's entitlement to claim priority of earlier application
- 4. Declaration of inventorship (for the purposes of the USA only)
- 5. Declaration as to non-prejudicial disclosures or exceptions to lack of novelty

The data for the declarations is contained in the separate *declarations.xml* file, which is referenced by the <declaration-doc> element and an <other-doc> element in the *package-data.xml* file. The document code is PCTDECLXML.

The number of declarations is indicated by the quantity attribute in each of the <declaration1> to <declaration5> elements within the <declarations> element in the request.xml file.

PDF Pct101.PDF

| _ | VIII | Declarations | Number of declarations |
|---|--------|---|------------------------|
| 6 | VIII-1 | Declaration as to the identity of the inventor | 1 5 |
| | VIII-2 | Declaration as to the applicant's entitlement, as at the international filing date, to apply for and be granted a patent | - |
| 4 | VIII-3 | Declaration as to the applicant's entitlement, as at the international filing date, to claim the priority of the earlier application | 3 |
| 2 | VIII-4 | Declaration of inventorship (only for the purposes of the designation of the United States of America) | 1 1 |
| | VIII-5 | Declaration as to non-prejudicial disclosures or exceptions to lack of novelty | - |

Figure 205: Declarations indicated in PDF request

The text of each declaration is printed on a new page within the PDF form. The figure below shows only the first example for the declaration type *Identity of inventor*.

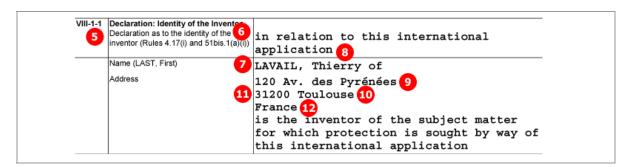

Figure 206: Details of "Identity of the Inventor" declaration

7.9 PCT/RO/101 Contents

The *Contents* screen of PCT/RO/101 provides three different modes of attaching specification documents:

- 1. XML attachments
- 2. **PDF attachments** multiple PDF files for description, claims and abstract, PDF/TIFF/JPG files for the drawings
- 3. **PDF attachment single specification file** description, claims and abstract are contained in one text document, separate PDF/TIFF/JPG files for the drawings

The *Accompanying items* sub-tab offers the following options:

- Original separate power of attorney
- Original general power of attorney
- Copy of general power of attorney
- Statement explaining lack of signature
- ◆ Translation of international application into...
- Separate indications concerning deposited microorganisms or other biological material
- Statement as to identity of copy/copies with the sequence listing part of the description
- ◆ OTHER (type of document indicated by user)

The file format for all attachments is PDF: Some extra options are available depending on the type of attachment.

A *pre-conversion archive* (ZIP archive containing the original documents prior to conversion into PDF files) can be attached additionally, regardless of what other files are included. The pre-conversion archive is not accounted for in the total number of sheets in the submission.

(i) For a list of the standard document names required by the EPO see **Document codes and file types for PCT/RO/101** (p. 167).

7.9.1 Contents - Example 1: Specification in one combined PDF file

This example shows an application with the specification in one PDF file, a sequence listing file and a table related to sequence listings. For more details of biological material and sequence listings, see **PCT/RO/101 Biology** (p. 199).

7.9.2 Contents - Example 2: Specification attached in XML format

In this example, the international application in XML format has been prepared using the PatXML tool. Three images in TIF format are referenced as <figure> elements in the original PXML file. The figure to be published with the abstract is indicated inside the <abstract> element.

Online Filing converts the XML attachment into an *application-body.xml* file which contains text elements instead of references to the PDF files. Additionally, the *application-body.PDF* file is created in a printer-friendly layout including the drawings. This PDF file is referenced as <document-code>REQPDF</document-code> in the *pkgheader.xml* file, but it must not be imported.

7.9.3 Contents - Example 3: Specification in multiple PDF files with accompanying items

In this example, the patent specification is attached in four separate files: description, claims, abstract and drawings. In the *Contents* GUI, these files are listed in the *International Application* sub-tab.

GUI PCT/RO/101 Contents, International Application sub-tab

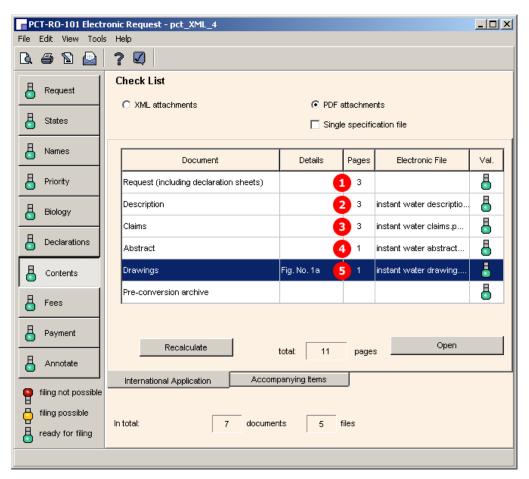

Figure 218: Contents GUI: specification attached in multiple PDF files

The applicant has signed a separate power of attorney for his agent, which is attached as an extra XML file named *power-of-attorney.xml*. More details on this XML file can be found in *Power of Attorney* (p. 193).

To demonstrate some of the other options in the *Accompanying items* sub-tab, the following additional files are attached:

- Original general power of attorney (PDF)
- ◆ Translation of international application (PDF)
- ◆ OTHER: original drawings in Italian (TIFF)
- ◆ OTHER: translation of text in drawings (PDF)

Figure 224: Request PDF - checklist and accompanying items

7.10 PCT/RO/101 Fees

Like biological material and declarations, fees are contained in a separate XML file. The *fee-sheet.xml* file must be included in the application package.

The existing fee sheet is indicated by the <cl-fee-calculation/> element within the <check-list> element in the *request.xml* file.

The **fee-sheet.xml** file is referenced in the **package-data.xml** file by the **fee-calculation-sheet**> element and by an **fee-calculation-sheet**> element and by an **fee-calculation-sheet**>

In addition, Online Filing generates the *Fees.PDF* file from the data in the *fee-sheet.xml* file. This PDF file is currently not part of the transmission to the EPO.

GUI PCT/RO/101 Fees

The fees are automatically calculated by Online Filing after the *Fee schedule valid from* date (2) has been selected.

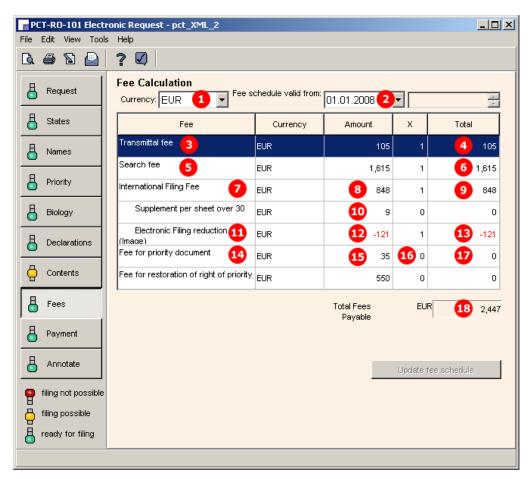

Figure 225: Fees GUI: payable fees listed

Element list

- (1) Currency: default is EUR (this is repeated by the currency attribute in each fee element)
- (2) Date for fee schedule validity
- (3) Transmittal fee
- (4) Total amount for transmittal fee (mandatory)
- (5) Search fee
- (6) Total amount for search fee (mandatory)
- (7) International filing fee
- (8) Amount for one international search
- (9) Total amount for search fee
- (10) Page number of application (displayed in *Contents* GUI): if there are more than 30 sheets, a supplementary fee has to be paid
- (11) Reduction fee for electronic online filing
- (12) Amount for reduction
- (13) Total amount for international filing fee = (8) + (11) (not displayed in GUI)
- (14) Fee for priority document
- (15) Amount for one priority document
- (16) Quantity of priority documents
- (17) Total amount for priority documents
- (18) Total amount fees payable
- (19) User reference
- (20) Applicant's name (as entered in Names GUI)
- (21) International Searching Authority (as entered in *Request* GUI)
- (22) Payment mode: this element must be identically contained in each fee element
- (23) Selected mode: this child element depends on selection in the *Payment* GUI, e.g. <charge/> for automatic charge from deposit account and <cheque/> for payment by cheque
- (24) Fee sheet is indicated in request.xml checklist
- (25) Reference to fee-sheet.xml file in package-data.xml file
- (26) Reference to fee-sheet.xml file
- (27) Document code for fee sheet XML file (same element exists in pkgheader.xml file)
- (28) Reference to Fees.PDF file
- (29) Document code for fee sheet PDF file (same element exists in pkgheader.xml file)

7.12 PCT/RO/101 Annotate

Three types of annotation or remark are available in the Annotate GUI:

- 1. Remark (note to EPO)
- 2. Private remark (neither stored in XML files nor transmitted to EPO)
- 3. Inventor(s) for certain designated states only

The remark is represented by a simple text string in a <dtext> element within the *request.xml* file. This text also appears in the *ValidLog.PDF* file.

The selection of designated states is added in the <designated-states-as-inventor> element as child of the respective <applicant> or <inventor> element.

The *validation log* is created automatically by Online Filing. The *ValidLog.PDF* and *validation-log.xml* files must not be imported.

GUI PCT/RO/101 Annotate

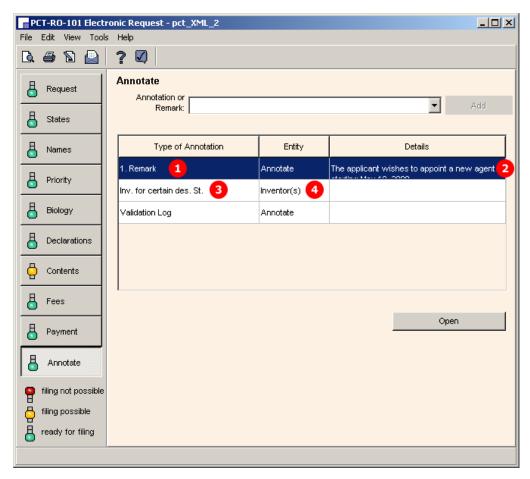

Figure 233: Annotate GUI: remark, designated states for inventor

Element list

- (1) Remark
- (2) Text for applicants remark
- (3) Designated states for inventor
- (4) Inventor

XML request.xml

The <designated-states> list (3) is grouped into multiple blocks, depending on which states are selected and which regions these states belong to. Each <country> element is listed twice: first as an individual state and once again under the respective <region> element. In the example below, the selected countries belong to the regions Africa (AP) and Europe (EP).

8 Annex

8.1 Abbreviations

EPO = European Patent Office

GUI = Graphical User Interface

BO = Business Object

FOP = Formatting Objects Processor

PMS = Patent Management System

OLF = Electronic Online Filing

8.2 International standards for PCT

XML data and structures in Online Filing follow the standards set by the *Patent Cooperation Treaty (PCT)* as of 2 January 2002 (updated 1 April 2007).

PCT standards, rules and regulations are published by the *World Intellectual Property Organization* (WIPO).

The following sections of the **WIPO website** (http://www.wipo.int) may be of interest to developers looking for more information on PCT standards and rules for XML documents:

- ◆ PCT Resources (http://www.wipo.int/pct/en/)
- PCT Treaty, Regulations and Administrative Instructions (http://www.wipo.int/pct/en/texts/) (including the Annex F)
- Electronic Filing (PCT-SAFE) (http://www.wipo.int/pct-safe/en/)
- List of WIPO Standards, Recommendations and Guidelines (http://www.wipo.int/scit/en/standards/standards.htm)
- ◆ XML Library (http://www.wipo.int/pct-safe/en/resources/index.html) (including DTDs)

8.3 Annex F rules for documents and files

The European Patent Office can only accept electronic documents which are compliant with **Annex F** - **Standard for the filing and processing in electronic form of international applications**.

A full version of Annex F in English can be found on the **WIPO website** (http://www.wipo.int) under http://www.wipo.int/pct/en/texts/ and also for **download in PDF format** (http://www.wipo.int/pct/en/texts/pdf/ai_anf.pdf).

Rules for Annex F-compliant PDF files

The PDF file format is suitable for all documents containing text or images. For example, you can store additional descriptions and notes relating to your application in PDF format or scan original documents not available in electronic form and convert them into PDF files. See section 3.1.2 of Annex F for full details.

- ◆ PDF files must be compatible with Adobe PDF version 1.4 or higher.
- ◆ PDF files must not be encrypted.
- ◆ PDF files must not contain any embedded OLE objects.
- ◆ The text in PDF files must not be compressed.
- With the exception of the 11 standard Windows fonts, any fonts used in the PDF file must be embedded.

Rules for Annex F-compliant images

See section 3.1.3 of Annex F for the full details.

- ◆ TIFF (file type .tif)
 - Only black and white images are allowed
 - When saving an image as TIFF the following settings should be selected: TIFF V6.0 with Group 4 compression, single strip, Intel encoded (i.e. for IBM PC format, NOT MacIntosh).
 - Image resolution must be 300 or 400 dpi.
 - The recommended maximum page size is 255 mm x 170 mm.
- ◆ JPEG (file type .jpg)
 - Image resolution must be 300 or 400 dpi.
 - The recommended maximum page size is 255 mm x 170 mm.

8.4 Document naming conventions

The file naming convention established by the PCT lists several rules for the naming of documents, referenced files and other files. See section 4.3 of **Annex F** (http://www.wipo.int/pct/en/texts/pdf/ai_anf.pdf) for the full details.

The basic rules are:

- Only the following characters may be used for file names:
 - ABCDEFGHIJKLMNOPQRSTUVWXYZ
 - abcdefghijklmnopqrstuvwxyz
 - 0123456789
- File names are case-sensitive.
- The separator must be a period (.), followed by the file type.
- Accepted file name extensions are: txt, xml, tif, jpg, pdf, app, zip (use lower-case characters).
- File names must not exceed 128 positions altogether. The tables and examples in Annex F demonstrate how to assemble the different elements of the file names. These elements are separated by dashes (-).
- The different document and package types for initial ePCT filing must follow the codes in Table 6.
- ① Please note that other receiving Offices may issue their own file naming rules.

8.5 XML element list

All elements for XML files for the four procedures EP(1001E2K), Euro-PCT(1200E2K), EP(1038E) and PCT/RO/101 are listed in the element table below. The *Attributes* column contains the possible attributes for each element. Check the respective DTD file to see whether an attribute is mandatory or optional. The values allowed or required for the attributes are listed in the **XML attribute lists** (p. 243) section of the Annex.

1001 = ep-request.xml / ep-request-v1-4.dtd

1200 = ep-euro-pct.xml / ep-euro-pct-v1-02.dtd

1038 = ep-sfd-request.xml / ep-sfd-request-v2-0.dtd

PCT = request.xml / request-v1-4.dtd

* An \mathbf{x} in one of the four columns indicates that this element is part of the XML structure for one of the XML files used in the specific procedure.

8.7 Data length restrictions

The maximal data length for some text fields is limited. See all details for affected elements and attributes in the table below.

1 An \mathbf{x} in a column means that this element is applicable for the specific procedure.

| ELEMENT | 1001 | 1200 | 1038 | PCT | Max. data length | |
|--------------------|------|------|------|-----|-----------------------------------|--|
| addcopies | х | х | х | | 2 | |
