1 What is the Online Filing software (OLF)?

The Online Filing software (OLF) enables you to submit patent applications and subsequently filed documents electronically over a secure Internet link. A key benefit of this service is that you receive the receipt immediately. The receipt contains the application number as well as the date and time the application was received.

With the Online Filing software you can file

- European patent applications with e-filing-enabled filing offices in the EPO member states (Form EP(1001E2K))
- Entry into the regional phase with the EPO (Form Euro-PCT(1200E2K))
- Subsequent documents with the EPO (Form EP(1038E))
- Documents relating to appeal, revocation and limitation proceedings with the EPO (Form EP(1038E))
- Documents relating to opposition proceedings with the EPO (Form EP(Oppo))
- PCT applications with the EPO and WIPO (RO/IB) and with e-filing-enabled receiving offices in the EPO member states (Form PCT/RO/101)
- Subsequent documents for all PCT procedures with the EPO, as well as payment of related fees (Form PCT-SFD)
- Demands for international preliminary examination with the EPO, as well as payment of related fees (Form PCT/IPEA/401)
- National applications with e-filing-enabled national offices in the EPO member states (optional). The required plug-ins are made available, defined and maintained by the national offices concerned. See the EPO website at [Online Filing in national offices](#) for a list of participating offices and supported procedures.
- Requests for unitary effect on granted European patents (Form UP7000)
- Subsequent documents with Unitary Patent (Form UP7038)

2 System requirements

In order to run OLF, your system should have:

- Intel Pentium 4 processor (or equivalent) 2.4 GHz (or above, depending on operating system)
- 2 to 4 GB RAM (depending on operating system)
- 4 GB hard disk free space (at least 10 GB recommended for server installation with database)
- Smart card reader connected to USB port, e.g. GemPC Twin

Supported operating systems for installing the Online Filing software (client, server or stand-alone):

- Microsoft Windows 8 / 8.1, 32-bit and 64-bit
- Microsoft Windows 10, 32-bit and 64-bit
- Microsoft Windows 11, 64-bit
- Microsoft Windows Server 2012 / 2012 R2, 64-bit
- Microsoft Windows Server 2016, 64-bit
- Microsoft Windows Server 2019, 64-bit

Arial Unicode Font

The MS Arial Unicode font is required to run the Online Filing software. This font can be installed from the Microsoft Office package (Microsoft Office 2013 or previous versions).

-  Microsoft Office 365 subscriptions, Microsoft Office 2016 and Microsoft Windows 7/11 no longer include Arial Unicode MS font. In this case, you must install this font from a different source for example from a computer using an earlier version of Microsoft Office. The font may also be obtained online.

3 Setup and configuration

-  **New EPO smart cards will no longer be issued from January 2024** and the Office intends to decommission smart cards as from 1 January 2025; please refer to Article 50, “Notice from the European Patent Office dated 3 May 2023 concerning new milestones for EPO online services”, published in the Official Journal EPO 5/2023 (www.epo.org/en/legal/official-journal/2023/05/a50.html)
-  For more information about the phasing out the use of smart cards in 2024, see the [dedicated FAQ](#).
-  When using OLF to file outside from the EPO (e.g. EP(1001E2K) with a filing office which is not the EPO) or using form PCT/RO/101, only the signature options available to that receiving or filing office or form will be shown.

Installing OLF version 5.15 from scratch

In order to install OLF version 5.15, please use the most recent full installation file **OLF515.exe** (build 5.0.15) which is available for download from the EPO website.

- ➔ Download and install Cryptovision sc/interface v 8 software and smart card driver from the EPO website (<https://www.epo.org/applying/online-services/security/reader.html>).
- You will find the download link in the welcome letter sent to you by EPO Customer Services.
- ➔ If not already installed, download and install **Adobe Reader 11.0.x** or higher (or Adobe Acrobat XI) from [Adobe](#).
- ➔ Download the latest version of the **Full package for installation of Online Filing (OLF)** from the EPO website at [Download software for filing with the EPO](#).
- ➔ To start the installation wizard, double-click the **OLF515.exe** installation file.
- ➔ Select the installation options as appropriate.

For more information, please refer to the **Installation Guide** available from the EPO website at [Download documentation](#).

- ➔ After successful installation, run **Live Update** from the Server Manager to install all available updates.

Alternatively, download all subsequent OLF patches from the EPO website and install them in the order of their release (oldest first). Updates are cumulative per area – only the latest EP, IB or

national update should be installed; previous updates are included in the latest package and will only be applied if necessary.

Starting with new patches from spring 2021, EPO online services packages, including OLF packages, will be digitally signed.

When you download, "signed" software gives you the assurance that the package is from the European Patent Office and is still valid, and that code has not been tampered with since being published, see the User Guide for more information.

Updating to OLF version 5.15 from an older version

It is not possible to update to version 5.15 directly from versions older than 5.14, build 5.0.14. Before installing the version 5.15 update, please upgrade your OLF installation either by running Live Update from the Server Manager or by downloading and installing all required updates and patches from the EPO website.

- ➔ To update OLF version 5.14 to version 5.15, run the **OLF515.exe** file.
- ➔ Proceed with the installation wizard.

Depending on your computer's performance, updating the database may take some time. You should plan at least one hour for completing the update.

- ➔ Restart the server machine, and then update the thin client on all workstations.

For information about updates, fixes and patches, you should check the EPO website at [Online Filing](#). If you have activated Live Update in OLF, you will normally be notified automatically. However, for technical reasons the EPO may not always be able to provide the files via Live Update. Users wishing to be automatically informed of OLF updates, fixes and patches should therefore sign up for the RSS feed with updates for the Online-Services.

Uninstalling the OLF software

To remove the software from your computer, proceed as follows:

- ➔ Open the Windows **Control Panel**.
- ➔ Go to **Programs > Programs and Features > Uninstall or change a program**.
- ➔ Select the OLF component to be removed from the list of applications that can be uninstalled by Windows:
 - If you have installed the stand-alone version, select **Online Filing 5.15**.
 - If you have only installed the OLF client, select **Online Filing Client 5.0**.
 - If you have only installed the OLF server, select **Online Filing 5.15**.
 - If you have installed both the OLF client and the OLF server, follow the steps for the client first and then repeat the procedure for the server.
- ➔ To uninstall the selected OLF component, click **Uninstall**.

- To increase the robustness of the update procedure, all procedures will be installed, but only the ones used are activated. Any procedure can be activated or deactivated at any time.

The procedural changes concerning amended Rules 161/162 EPC, changes in the rules for the filing of sequence listings and the minor functional changes and defects fixed are as follows:

EP(1001E2K)

- "Documents" tab - "Sequence Listings" sub tab:

For applications which contain sequence listings in the description it is no longer mandatory to file the sequence listing in PDF format. A WIPO standard 25 file is now mandatory. Layout and severity messages have been adapted to this legal change.

- "Priority" tab:

A copy of the search results required under Rule 141(1) EPC is not required if it is available to the EPO and is to be included in the file under the conditions determined by the President of the EPO. The European Patent Office shall include in the file of a European patent application a copy

of the search results referred to in Rule 141(1) EPC, thus exempting the applicant from filing said copy, where the priority of a first filing made in one of the following states is claimed: Japan, United Kingdom, United States of America.

EP(1200E2K)

- "EP Phase" tab:

Checkbox has been added to waive the right to the communication under Rules 161/162 EPC.

- "Documents" tab - "Sequence Listings" sub-tab:

For international applications which contain sequence listings in the description filed under Rule 5.2(a) PCT, or furnished to the EPO as ISA under Rule 13ter.1(a) PCT, or is otherwise available to the EPO, in computer-readable format in accordance with WIPO standard 25. In case the sequence listing is filed upon "Entry into the European Phase" the WIPO standard 25 is mandatory. Layout and severity messages have been adapted accordingly.

EP(1038)

- "Documents" tab:

Attachment of waiver document possible under category "Request".

Other changes

- EP(1001E2K):
 - The layout of the "Divisional" tab has been changed
 - When a divisional application is filed by reference to an international application it is now possible to enter the data for the international application in the "Reference" tab
 - The capture of the data regarding General Authorizations has been harmonized to EP(1200E2K)
- EP(1200E2K):
 - "Documents" tab: Attachment of new document type "Handwritten Amendments" possible under "Additional documents" screen

6 Known problems and limitations

- If you are using customised templates from earlier versions of Online Filing, some of the new features or bug fixes may not be available. We recommend that you verify the template and use the new standard templates as a basis.
- The OLF signature viewer only supports Acrobat Reader 5.0 and 6.01 and above or 7.00 and above.
- We advise checking for validation messages after filling up a form.
- Installation on certain versions of Windows 7 and Vista generates the error "This program might not have installed correctly" a few times. We recommend selecting the option "This program installed correctly" every time in order to allow the installation to progress.
- The user-defined description for "other document" cannot be imported via the PMS/Gateway interface. This does not, however, cause any problems with regard to the processing of the document.

More information can be found in the FAQ – Online Filing:

www.epo.org/en/service-support/faq/myepo-services/online-filing-software

7 Patent management system interface

Online Filing v5 offers a Web service interface for users' patent management systems (PMS). To use this interface, your PMS must be able to

- generate applications in WIPO standard Annex F XML format
- communicate with the Online Filing Web service. For more information consult the PMS Development Kit, available from www.epo.org.

To be able to carry out production filings from your PMS via the Online Filing PMS interface, your PMS must first be approved by the EPO. Find out more about obtaining approval under www.epo.org at ***Applying for a patent > Online services > Online filing > PMS interface***.
